

Congratulations Gold and Bute

Congratulations to Gold on winning the Secondary Participation Shield and Secondary Sports Day Shield, also congratulations to Bute Early Learning and Primary School on winning the Primary Combined Schools Sports Day Shield.

It was a fantastic day of friendship and sportsmanship.

First day of term 2
Monday 29 April to Thursday 2 May
Parent Teacher Interviews
Wednesday 1 May
Year 12 Math trip to KMS

Our combined sports day, with Snowtown Primary School and Bute Early Learning and Primary School was very successful. A little rain certainly didn't dampen the enthusiasm, and I'm sure most would agree, that the conditions were much more favourable than the heat of the previous week. Congratulations to all the competitors and thank you to the school communities for their support. An event of this size cannot run without volunteers. Thank you to everyone who helped on the day. Thanks to Nick Turra for coordinating all the work that goes in to making this day a success. Peter Button and Casey Ebsary had the grounds looking fantastic. Thanks also to Justin Brook, Paul Townsend, Tyler Norton, Josh Champion and the senior students for running events prior to sports day. Thanks to all the staff that do the extra things that contribute to a well-run event.

Congratulations to our students who represented the school at the Yorke Peninsula Interschool Sports Day this week. We were very successful winning the open pennant and the YP Country Times Shield. It was great to see many students challenge themselves and show great sportsmanship.

The Governing Council AGM was held on Tuesday 19 March. We currently have three vacancies on the committee. If you're interested in joining Governing Council, please contact the school. The next meeting is Tuesday 2 April.

On Wednesday 10 April we will hold our end of term assembly starting at 10am. All families and community members are invited to attend. SRC representatives will receive their badges.

Joelene Anderson
Principal

**Please take note that there is an early dismissal
of 2.10pm on Thursday 28th of March before
the Easter long weekend.**

Cross Age in the Junior Primary

This year the Kindergarten to Year 3 children are participating in a cross age program. The Year 2/3 class design a task, organize the resources and lead groups on a two week rotation. On the third week the Reception to Year 1 classes visit the Kindergarten. It has been fantastic to see the children interacting with each other and cooperating whilst doing fun activities.

I liked trying my best at colouring in my snake so I can get better at it.

- Billy C

It is was fun hitting the nails into the wood at Kindy. -- Sam A

I liked cross age because Mitchell helped me cut the eyes out for my mask.

- Lilly H

I had lots of fun playing in the river at Kindy with other children.

- Henry S

I enjoyed the cross age group doing puzzles and I loved reading books when we visited the Kindy. - Ollie M

Early warning signs of Scoliosis

Adolescent idiopathic scoliosis (AIS) is a scoliosis that affects children or adolescents from the age of 10 into young adulthood. Typically it is noticed around 11 to 12 years of age in girls, and a little later in boys. Like other types of scoliosis, AIS is characterised by an abnormal sideways S or C curve of the spine. Children with AIS are generally otherwise healthy.

AIS is the most common type of scoliosis. Up to 5% of all children between 10 and 18 years old will develop this type of scoliosis. It is also more commonly seen in girls than boys - 90% of scoliosis cases are girls. AIS also often begins to develop at the initial onset of puberty, and can progress rapidly during periods of growth.

In children and adolescents, the best chance to correct scoliosis is with early detection and treatment as they grow. This makes regular screening for the signs of scoliosis, early detection and proper management of high importance.

Early detection and treatment is important. To do this use the app below and if you have any concerns, contact your local health professional or visit a ScolioCare clinic (www.scoliocare.com).

Standing Assessment From the Back

- 1 Uneven shoulders
- 2 One prominent shoulder blade
- 3 A visible curve
- 4 Uneven hips
- 5 Asymmetrical waist

Forward Bending Assessment

- a Upper back hump
- b Lower back hump
